# 16 Way PDU with 12 x C13 + 4 x C19 sockets, 1 x 32A (Schneider) Circuit Breaker and 3 Mtr IEC60309 Industrial Power Plug

Avalon Power Distribution Units (PDU's) are used for controlling electrical power in the Data Center. This 16 Way Vertical PDU has 12 x C13 unlockable sockets + 4 x C19 unlockable sockets + 1 x 32A circuit breaker (Schneider) + 3 Mtr IEC60309 Industrial power plug (32A).

Features and Benefits

Installation	Vertical Installation / Cable Top (Rear Right)
Mounting brackets	- 70 Round hole flap (1 u); - 70 without baffle hole (1U)
Power input method	32A Industrial plug ; 3 * 6.0 mm squared the power cord【3M】(RVV)
Functional module	1p Type 32A Schneider EA9 circuit breaker
Output unit	C13 Socket - 1U【12】; C19 Socket - 1 u【4】
Housing Color	Black
Product size specifications	998*44.4*44.4 (mm) ±2mm
Fixed hole center distance	958 mm
Profile length	858 mm
Cable fixing method	PG terminal (Normal)
Rated voltage	220 - 250V 50/60HZ
Rated current	32A
Rated power	8,000W

Ordering Information

Part No.	Description
AN-16WPDUC13-C19-32A	16 Way Vertical PDU with Circuit Breaker (32A) 12 x C13 unlockable + 4 x C19 unlockable sockets, 1 x 32A circuit breaker (Schneider) 3 meter cable with IEC60309 Industrial plug (32A)
